**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no disclosure of the adjustment bar being pivotally attached to the housing as claimed in claim 1.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Groenenberg (US 6,277,059).

Groenenberg discloses a folding machine comprising housing 2 with a adjustable fold plates 30 and 31 for providing alignment for the folding procedure with adjustment bar 50; input table; stacking table 10 attached to the housing and receives paper sheets

exiting the housing from the input table; the sheets at this moment are considered "processed" due to the manipulation of each in transport to the stacking table; stacking arm 43 with rollers 42 attached to the housing and extending onto the stacking table 10 (see figure 5); stacking arm 43 is part of adjustable transport device 33 which is linked to adjustable plates 31; see figures 2-4 and column 4, lines 2-15.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 11 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Groenenberg (US 6,277,059) in view of Applicant's Admitted Prior Art.

Groenenberg does not directly disclose a removable plate enclosing a processing area of the housing however it is well known that such devices as the printer apparatus and its housing 2 would inherently contain doors/lids/openings for accessing the components therein which could be removed in a two step process ie. opening and removing/disconnecting. It would have been obvious as a matter of common knowledge to one of ordinary skill in the art to include a removable (by a two step process) plate in the housing for accessing the inner components/workings.

***Allowable Subject Matter***

7. Claims 2-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
8. Claims 21 and 23-24 are allowed.

***Response to Arguments***

9. The arguments are deemed moot as the newly added claimed limitation is not part of applicant's disclosure, as discussed supra.

***Conclusion***

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
